Project Number: 2020-1-CY01-KA204-065949

Introduction

The e-Protect project aims to provide people 65+ years old with useful information regarding internet use, safety, and cyber fraud. The multiplier event of the project was organised by KMOP in the context of the “Paths of Life” festival, which was the first festival in Greece that focuses on older people (65+ years old) and their interaction with younger generations. The festival took place on 15 and 16 October 2022 at Technopolis City of Athens, and it aimed to empower older people. It included educational and recreational workshops, intergenerational workshops and activities, scientific lectures, photo exhibitions, and live performances from different organisations.

On the first day of the festival, KMOP held the e-Protect project’s Multiplier Event, which was attended by 22 people. The event had the title “Fraud and Fake News on the internet” and aimed to inform people, especially over 65, regarding the risks and dangers of internet use. In addition, on the 04th of November, KMOP’s team did an information session to elderly persons at the community centre of Nea Ionia, in Athens.

Agenda

The event on the 15th of October started at 12:30 pm and it consisted of three speakers:

The first speaker, Klimentini Diakomanoli, head of press of the European Commission in Greece, and writer about fake news and Europe regulations, analysed the European context. She described the dangers on the internet and media regarding fake news – focusing on COVID-19-related fake news. Then, she talked about European strategic Policies, what is missing, and future plans.

The second speaker was a representative of the Cyber Crime Unit of the Hellenic Police. He did an interactive presentation regarding dangers and risks on the internet and explained how we all must use technology. People learned how to protect themselves and their data while they use the internet.

Finally, KMOP presented the e-Protect project. We presented general information about the project, its objectives, and its results. Specifically, we presented in detail the basic deliverables of the project: the Competency Scale for consumer and data protection skills for elderly people, the e-Protect Curricula for Internet Safety, the e-Protect Training, and the e-Protect Digital Platform. Also, we presented the innovative actions and the skills that

people 65+ will develop through it. At the end of the presentation, we introduce the E-learning tool and invited the participants to use it. The event finished with a Q&A session not only for internet use but also for the e-Protect project and its importance.

At the information session of the 4th of November, KMOP's team informed 13 elderly of the community center about the e-protect project.

Evaluation results

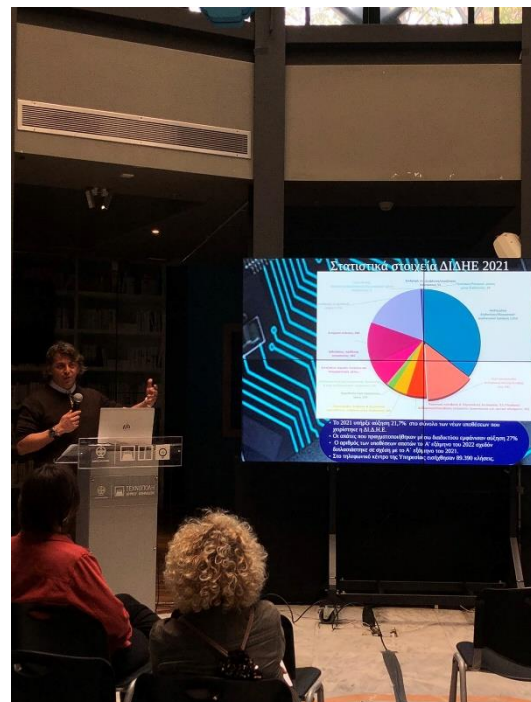

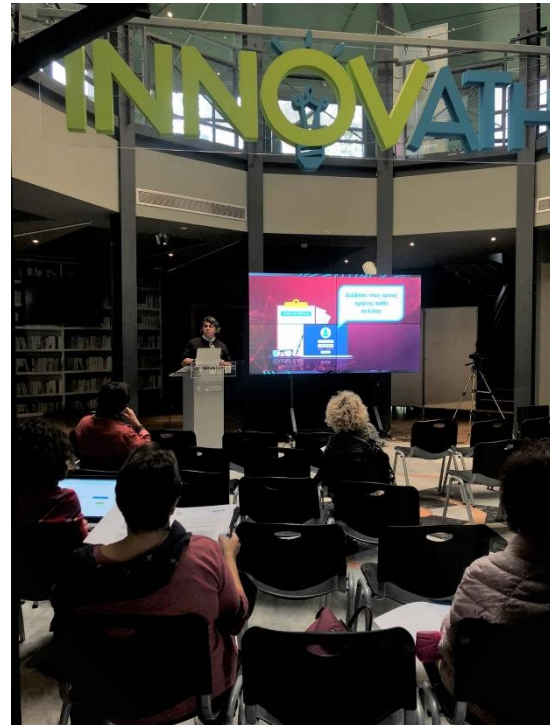

The event was a great success and was followed by a Q&A session. After the end of the Multiplier Event, we asked the participants to fill out the evaluation form (see Appendix D.). Eight (8) participants filled the questionnaire. The participants were satisfied with the information they received – such as the right way to create passwords and the importance of the software's update – and they answered that the event was helpful and useful for their daily life. From the participants' answers, we understand that there is a lack of elderly people's education regarding internet use. Finally, they commented that they will share the knowledge they gained with their family, colleagues, and friends, while one of them stated that it is important to be informed and educated. At the information session, none of the participants completed the questionnaire, but they mentioned that they liked the topic of the project.

Conclusions

The multiplier event & information session that took place in Greece were successful. The participants found the topics of e-protect project relevant to their needs and enjoyed the presentations of the speakers.

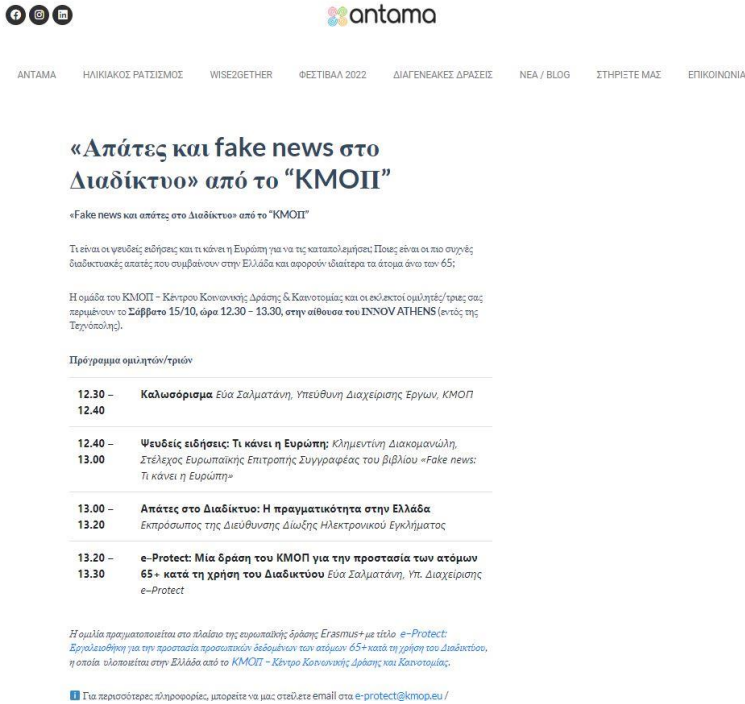

Appendix

A. Photos of the Event on the 15th of October

B. Promotion Material

- Antama's website promotes our Multiplier Event and its agenda.
- The e-Protect leaflet with the leaflet of the festival.
